## DJOKAVIC'S AUSTRALIAN DILEMMA.

BY DANITZA VARELA VIDAL, ADRIÁN OTERO SALGADO  
PABLO GARCÍA RODRÍGUEZ AND BRAIS GALLEGO CID

Novak Djokovic the world No 1 men's tennis player is set to be deported from Australia, after his visa was cancelled for a second time, in a row over his right to remain in the country unvaccinated.

Djokovic originally flew to Australia with a 'vaccine exemption' and arrived in Melbourne on the 5th January. But was then detained and after a lengthy legal battle between his legal team and the Australian Government, the sport star was ordered to leave the country without participating in the Australian Open, a Grand Slam tournament he has won for the last three years.

Longer term, Djokovic's visa cancellation could further harm his chances of adding to his future silverware, and should he choose to remain unvaccinated for Covid-19, his entry into other Grand Slams may also be affected as authorities tighten travel and border restrictions in the third year of the pandemic.

## 6TH PRIMARY: RAW MATERIALS PROJECT

BY ZOE DO PARK, MARÍA FERNANDA CASTRO ANAYA,  
NEREA SOTO VILARCHAO AND IVANA ANTÍA LEZAMA VERDINI

The students of 6º of primary were given a project to complete in their Social Science class this month. The topic of the project was raw materials, specifically raw materials found in the different areas of Galicia such as Lugo, Vigo, A Coruña and Ourense.

Our task was to research and design a poster describing the different types of raw materials that you can find coming from each area. These raw materials could be things like food, livestock, minerals, or also companies and factories that cultivate and produce raw materials.

We discovered that in A Coruña they use minerals like quartz and coal, in order to produce electronic circuits and fuel to generate electric power. In Lugo they have the famous dairy brand Larsa which provides a range of dairy products nationwide.

In Vigo the seafood industry is very important and the Port of Vigo is home to one of the world's largest fishing companies Pescanova. Finally, here in our very own Ourense you can find the chemical element, Niobium, which is used in alloys including stainless steel. Alloys containing niobium are used in jet engines and rockets, beams and girders for buildings and oil rigs, and oil and gas pipelines.

## NETFLIX MOVIE: GO KARTS

BY JULIAN BENEITEZ FERNÁNDEZ, AND CARLOS CASQUERO GONZÁLEZ

### Production of the movie.

*Go Karts*, also known as *Go!*, is a 2019 coming of age sports drama film directed by Owen Trevor. The film stars William Lodder, Frances O'Connor and Richard Roxburgh in the lead roles.

The film is based on a Kart racing community in Western Australia and tells the story of an underdog winning the National Kart racing championship.

The film, originally titled *Go!*, premiered at the 2019 CinefestOZ Film Festival and was released to theatres on 16 January 2020 in Australia. The film was added to Netflix on 13 March 2020, and it is still available on the platform for your enjoyment.

### Whats the movie about?

Jack and his single mother Christie move into a small town in Western Australia, after the death of his father Hooper to cancer.

Jack's mum tells him about a party at a go-kart racetrack and encourages him to go and meet new people from the town. Jack decides to go and he surprisingly develops an interest and passion for the sport of go-karts.

Jack quickly discovers he is really good at the sport, and is striving hard to win the Australian National Go Karts Championship by defeating the best drivers in Australia.

He gets the support of his mentor Patrick and his best mates Colin and Mandy to achieve his dream. However, he has to confront the obstacles to defeat the ruthless champion Dean who is his strongest competitor.
